

Cinema Facility Identifier

Syntax: urn:cfid:{identifier-owner}:{identifier}

where

cfid : the proposed namespace identifier <NID> for the Cinema Facility Identifier

{identifier-owner} : a string identifying the owner of {identifier}

{identifier} : a string defined by the owner that identifies the cinema facility

Management:

The identifier for {identifier-owner} is managed by the owner itself. If entity "A" maintains a database of identifiers from entity "B," it should do so utilizing the {identifier-owner} ID defined by entity "B."

Examples:

urn:cfid:deluxe:{a cinema identifier string defined by Deluxe}

urn:cfid:technicolor:{a cinema identifier string defined by Technicolor}

urn:cfid:disney:{a cinema identifier string defined by Disney}

etc.
